

## TCI® 300M Input Shafts For GM 4L80E Transmissions

Ashland, MS – New 300M Input Shafts for GM 4L80E Transmissions expand line of performance input shafts from TCI®

These ultra-durable input shafts are constructed from 300M alloy, which is a modified, heat-treated 4340 steel that is proven to be stronger than stock or other aftermarket input shaft materials and resists breaking and twisting in order to handle 1000+ horsepower applications. Precision-ground bushing rides ensure a smooth surface to eliminate premature bushing failure while the rolled splines further increase strength by replacing the unnecessary hobbled area that typically occurs when shafts are cut with a gear hob. Instead, the rolling process actually compacts the splines, causing the material in this area to be denser and therefore, stronger. Their higher yield strength results in less shaft twisting than standard OEM material, additionally reducing the stress that shaft twisting often introduces. These 300M Input Shafts for GM 4L80E Transmissions will provide optimum stress distribution along the entire length of shaft in high performance transmissions. However, they also fit as stock replacements and require no modifications for installation.

### Quick Facts

**Product:** TCI® 300M Input Shafts for GM 4L80E Transmissions

**Part Number:** #279600

**Street Price:** \$ \$299.25

**Social Media Pitch:** New TCI® 300M Input Shafts for GM 4L80E Transmissions are designed to resist breaking and twisting in order to handle 1000+ HP applications

#### **Features & Benefits:**

- Input shafts for GM 4L80 overdrive transmissions are constructed from modified, heat-treated 4340 steel to resist breaking and twisting
- 300M alloy is proven stronger than stock and other aftermarket manufacturers' input shafts
- Rolled splines greatly increase shaft strength & durability by replacing the unnecessarily hobbled areas with compacted, denser splines
- Handles 1000+ horsepower 4L80E applications, but fits & installs like a stock replacement

### **About TCI®**

When TCI® opened its doors in 1968, it was a modest operation dedicated to delivering high performance transmission-related parts to a small group of drag racers. From those humble beginnings in Memphis, TN, TCI® has grown to be one of the largest and most technologically advanced manufacturers of high performance aftermarket drivetrain products. Now located in Ashland, MS, some 45 miles from parent company the COMP Performance Group™, TCI® continues to set trends and expand its line of quality transmission, torque converter and accessory parts.
