

## TCI® 10" Billet Front Breakaway® Torque Converter For E40D Transmissions

**Ashland, MS** – The new TCI® 10" Billet Front Breakaway® Torque Converter increases strength and reduces weight.

Engineered to be stronger and perform better, the new TCI® 10" Billet Front Breakaway® Torque Converter For E40D Transmissions includes several performance upgrades. The sturdy, billet front design increases strength but the 10" core reduces overall weight. Furnace-brazed components further increase strength to handle higher horsepower and nitrous applications. Heat-treated splines and hub will withstand harder launches off the line and stop premature clutch wear. And finally, increased stall speed results in quicker reaction times and lower ETs. TCI® proprietary HDT (Heat Dissipating Technology™) Coating™ enables cooler temperatures and more efficient drivetrain operation. Every TCI® torque converter is built to exact specifications and is Triple Tested during assembly. The TCI® 10" Billet Front Breakaway® Torque Converter for E40D Transmissions improves strength and performance over the stock converter and is a must when upgrading to a more aggressive cam or installing any power adders.

### Quick Facts

**Product:** TCI® 10" Billet Front Breakaway® Torque Converter for E40D Transmissions

**Part Number:** #492205

**Street Price:** \$1,075.47

**Social Media Pitch:** TCI 10" Billet Front Breakaway Torque Converters for E40D Transmissions reduces weight but stands up to the demands of high performance applications

#### **Features & Benefits:**

- Billet front design with 10" core weighs less but increases strength dramatically over stock converters
- Furnace-brazed components are strong enough to handle high horsepower & nitrous applications
- Heat-treated splines hold up to harder launches
- Increased stall speed results in quicker reaction times
- Features TCI® proprietary HDT Coating™ for cooler temperatures and more efficient operation

### **About TCI®**

When TCI® opened its doors in 1968, it was a modest operation dedicated to delivering high performance transmission-related parts to a small group of drag racers. From those humble beginnings in Memphis, TN, TCI® has grown to be one of the largest and most technologically advanced manufacturers of high performance aftermarket drivetrain products. Now located in Ashland, MS, some 45 miles from parent company the COMP Performance Group™, TCI® continues to set trends and expand its line of quality transmission, torque converter and accessory parts.
