

TCI® StreetFighter® Torque Converter For C6 Corvettes

Ashland, MS – Popular TCI® StreetFighter® Torque Converters are now available for C6 Corvette applications.

The added strength and reliability of TCI® GM 6L80E StreetFighter® Torque Converters are now available for C6 Corvette applications. Furnace-brazed components increase stall for better performance and add strength for higher horsepower and/or nitrous applications while the heat-treated splines and hub withstand harder launches off the line. The billet front design is strong enough for use with nitrous and other power adder options, while both that and the clutch assembly eliminate the chance of converter clutch slippage under heavy throttle. As with all TCI® torque converters, the StreetFighter® for C6 Corvettes also features the TCI® proprietary HDT (Heat Dissipating Technology™) Coating™, which enables cooler temperatures and more efficient drivetrain operation. Every TCI® torque converter is built to exact specifications and is Triple Tested during assembly. When considering a horsepower upgrade to the C6, this converter is a must, due to the weak design of the stock converter. Designed for street/strip applications and good for use with aftermarket camshafts, nitrous or other power adders.

Quick Facts

Product: TCI® StreetFighter® Torque Converter For C6 Corvettes

Part Number: #242975

Street Price: \$1,114.89

Social Media Pitch: The added strength and reliability of TCI® GM 6L80E StreetFighter® Torque Converters is now available for C6 Corvette applications

Features & Benefits:

- Popular GM 6L80E StreetFighter® Torque Converter now available for C6 Corvettes
- Designed for street/strip & benefits aftermarket cams, nitrous or other power adding options
- Furnace-brazed components increase strength for higher horsepower applications
- Heat-treated splines, sprag races & hub are capable of handling harder launches
- HDT Coating™ cools operating temperatures & enables more economical drivetrain operation
- Triple Tested during assembly to ensure performance

About TCI®

When TCI® opened its doors in 1968, it was a modest operation dedicated to delivering high performance transmission-related parts to a small group of drag racers. From those humble beginnings in Memphis, TN, TCI® has grown to be one of the largest and most technologically advanced manufacturers of high performance aftermarket drivetrain products. Now located in Ashland, MS, some 45 miles from parent company the COMP Performance Group™, TCI® continues to set trends and expand its line of quality transmission, torque converter and accessory parts. For more information about TCI® and its products, visit us online at www.tciauto.com, or call us at 1.888.776.9824.
