

TCI® Vasco 300 Input Shafts For Powerglide Applications

Ashland, MS – Vasco 300 Input Shafts for Powerglides offer the ultimate in durability for high performance applications.

These ultra-durable input shafts are constructed from a heat-treated Vasco 300 material, which is proven to be stronger than stock and other aftermarket input shaft materials. These input shafts are durable enough to resist breaking and twisting in performance applications up to 1,300 horsepower. Precision-ground bushing rides ensure a smooth surface to eliminate premature bushing failure and reduce the risk of fluid leakage. The Teflon sealing rings won't break like stock cast-type rings and seal 100% better. Precision-machined splines increase durability and set these input shafts apart from the competition. The shafts' higher yield strength results in less shaft twisting than standard OEM material, additionally reducing the stress that the twisting often introduces. These Vasco 300 Input Shafts will provide optimum stress distribution along the entire length of the shaft in high performance transmissions, thus reducing breakage problems associated with stock input shafts in high horsepower Powerglide applications.

Quick Facts

Product: TCI® Vasco 300 Input Shafts for Powerglide Applications

Part Number: #749201 (Turbo SPL, 1.82); #749301 (Powerglide SPL, 1.82); #749601 (Turbo SPL, 1.76); #749701 (Powerglide SPL, 1.76)

Street Price: \$330.19 – \$330.37

140 Character Pitch: TCI® Powerglide Vasco 300 Input Shafts are built to resist breaking and twisting in order to handle applications up to 1,300 HP

Features & Benefits:

- Vasco 300 is proven stronger than stock & other aftermarket input shaft materials
- Handles up to 1,300 HP Powerglide applications
- Precision-ground bushing rides decrease chance of fluid leakage and premature bushing failure
- Teflon sealing rings won't break like stock cast-type rings & seal 100% better than cast rings
- Higher yield strength results in less shaft twisting & common breakage problems

#749201

About TCI®

When TCI® opened its doors in 1968, it was a modest operation dedicated to delivering high performance transmission-related parts to a small group of drag racers. From those humble beginnings in Memphis, TN, TCI® has grown to be one of the largest and most technologically advanced manufacturers of high performance aftermarket drivetrain products. Now located in Ashland, MS, some 45 miles from parent company the COMP Performance Group™, TCI® continues to set trends and expand its line of quality transmission, torque converter and accessory parts. For more information about TCI® and its products, visit us online at www.tciauto.com, or call us at 1.888.776.9824. Also follow us on Facebook at facebook.tciauto.com or Twitter at twitter.com/TCIAuto.
