

Powerhouse® Remote Starter Switch

Memphis, TN – With the Remote Starter Switch from Powerhouse® Products, you can safely and easily start your car from under the hood.

How many times have you been working on an engine and needed someone to sit inside the car and bump the starter over, or worse yet, been showered with sparks when you used a screwdriver across the starter solenoid? The push-button Remote Starter Switch from Powerhouse® Products lets you turn the engine over from under the hood, all by yourself. Attach one clip to the car battery and one to the starter solenoid. Then simply press the button to start your car from under the hood. The clips are rubber coated to eliminate shocks and accidents. A long cord reaches under the car, and the starter's durable push-button handle will stand up to the abuse of shop life and last for years. This is a must have tool for any project that requires frequent starts. Adjusting your valves will never be a two-man job again.

Quick Facts

Product: Powerhouse® Remote Starter Switch
Part Number: #POW301220
Street Price: \$17.37

Social Media Pitch: The Powerhouse® push-button Remote Starter Switch (#POW301220) lets you turn the engine over from under the hood, all by yourself.
