

Quarter Master® Tri-Lite Hydraulic Release Bearings

Lake Zurich, IL – Tri-Lite Hydraulic Release Bearings from the nation’s leading driveline innovator weigh less and last longer than the competition.

Weighing just 1.3 pounds, Tri-Lite Hydraulic Release Bearings from Quarter Master® reduce the overall weight of your race-winning driveline. Tri-Lite Bearings are CNC-machined from billet aluminum for maximum durability in your race applications and are hard-coat anodized for corrosion and wear resistance. These bearings can be ordered with or without a return spring, and no shimming is required during installation. When ordering, simply specify which clutch system is being used in order to choose the properly sized piston for your setup – pistons available in .100" increments to work with a wide range of applications.

Quick Facts

Product: Quarter Master® Tri-Lite Hydraulic Release Bearings
