

## FAST™ XFI 2.0™ C-Com® Software Receives Downloadable Update

**Memphis, TN** – The revolutionary new XFI 2.0™ from FAST™ is more advanced than ever with a downloadable update available at [www.fuelairspark.com](http://www.fuelairspark.com).

Version 2.002 of the C-Com® software for the XFI 2.0™ Electronic Fuel Injection System is now available via a free download from the FAST™ website. This latest version of the C-Com® software includes several new features that deliver an unprecedented level of drivetrain control and flexibility to your XFI 2.0™ fuel injection system. The TPS Auto Calculate function now has the ability to work with reverse polarity TPS applications. A user-programmable Baro correction table for Alpha-N users has been added, replacing the fixed correction table that was hard coded and not user adjustable. This is good for N<sub>2</sub>O users with a sealed forward facing hood scoop. A negative slew rate feature has also been added to the Boost Controller. Intelligent Traction Control™ users will experience an update in the (ITC) PA Mode table memory function. Finally, XIM™ Sync and XIM™ RPM sensors were added as well. All of these new features are available in a single download available at [www.fuelairspark.com](http://www.fuelairspark.com).

### Quick Facts

**Product:** FAST™ XFI 2.0™ Version 2.002 C-Com® Software Update

**Social Media Pitch:** The revolutionary new XFI 2.0™ from FAST™ is more advanced than ever with a downloadable update available at [www.fuelairspark.com](http://www.fuelairspark.com)
