

Powerhouse® Air Operated Valve Holder

Memphis, TN – There is no easier way to keep valves from falling into the cylinders when changing valve springs than the Powerhouse® Air Operated Valve Holder.

The Air Operated Valve Holder from Powerhouse® Products is the perfect accessory when it's time to replace valve springs or valve stem seals. Simply thread one end into the spark plug tube and attach the other end to an air compressor. Air pressure will keep the valve from falling into the cylinder, allowing you to easily work without taking the cylinder head off. With a heavy-duty 12" flexible hose and convenient two-step fitting for both 14mm and 18mm threads, access to both the spark plug hole and air supply is never a problem.

Quick Facts

Product: Powerhouse® Air Operated Valve Holder
Part Number: #POW301024
Street Price: \$11.08

Social Media Pitch: There is no easier way to keep valves from accidentally falling into cylinders when changing springs than the Powerhouse® Air Operated Valve Holder

Features & Benefits:

- Perfect accessory when replacing valve springs or valve stem seals but don't want to remove heads
- Constant air pressure keeps valves from accidentally falling into the combustion chamber
- Heavy-duty 12" flexible hose easily stretches from the spark plug hole to your air supply
- Two-step fitting works with 14mm & 18mm threads
