

TCI® StreetFighter® Torque Converter For 2011-2012 Ford Mustangs

Ashland, MS – Popular TCI® StreetFighter® Torque Converters are now available for 2011-2012 Ford Mustangs with 5.0L Coyote engines and 6R80 transmissions.

The performance and reliability of TCI® StreetFighter® Torque Converters are now available for 2011-2012 Ford Mustangs. These new torque converters are built tough enough to handle more radically prepared street/race applications utilizing the powerful 5.0L Coyote engine and 6R80 transmission. Furnace-brazed components increase the unit's strength to withstand high horsepower and nitrous applications. The extra-durable, heat-treated splines, sprag races and hub will stand up to harder launches off the line, while the aftermarket billet front and clutch assembly stop the chance of converter clutch slippage under heavy throttle racing requirements. But with its combination of strength and drivability, the StreetFighter® Torque Converter for 2011-2012 Mustangs offers excellent performance for street use as well. As with all TCI® torque converters, it also features the TCI® proprietary HDT (Heat Dissipating Technology™) Coating™ which enables cooler temperatures for more efficient drivetrain operation. Each TCI® Torque Converter is built to exact specifications and is Triple Tested after assembly. TCI® StreetFighter® Torque Converters For 2011-2012 Ford Mustangs are manufactured to withstand the rigors of nitrous injection systems and other power adder options.

Quick Facts

Product: TCI® StreetFighter® Torque Converter For 2011-2012 Ford Mustangs

Part Number: #456010

Street Price: Call For Pricing

Social Media Pitch: Great for radically prepared street/race machines, popular TCI® StreetFighter Torque Converters are now available for 2011-12 Ford Mustangs

Features & Benefits:

- Popular StreetFighter® Torque Converters are now available for 2011-2012 Ford Mustangs utilizing 5.0L Coyote engines and 6R80 transmissions
- Designed for street/strip & benefits aftermarket cams, nitrous or other power adder options
- Furnace-brazed components increase strength for higher horsepower applications
- Heat-treated splines, sprag races & hub are capable of handling harder launches off the line
- HDT Coating™ cools operating temperatures & enables more economical drivetrain operation

About TCI®

When TCI® opened its doors in 1968, it was a modest operation dedicated to delivering high performance transmission-related parts to a small group of drag racers. From those beginnings in Memphis, TN, TCI® has grown into one of the largest, most technologically advanced manufacturers of high performance aftermarket drivetrain products. Now located in Ashland, MS, some 45 miles from parent company the COMP Performance Group™, TCI® continues to expand its line of transmission, torque converter and accessory parts.
